About Doctyn

Doctyn Academy is India's fastest-growing medical ed-tech platform built to help doctors learn smarter, train better, and grow faster. Created by doctors, for doctors, we offer structured clinical programs, hands-on training pathways, hospital-integrated learning, and continuous mentorship - all designed to strengthen real-world clinical practice.

We bridge the gap between traditional medical education and the evolving demands of modern healthcare. Through flexible online learning, immersive hospital based training, mentorship by expert faculty, and collaborations with leading medical institutions, we equip doctors with skills that directly improve patient care, confidence, and career opportunities.

About the Fellowship

The **Advanced Fellowship in Critical Care Medicine** is a fully hands-on, clinically immersive program designed to make MBBS doctors confident and competent in real ICU settings. Over 12 months, you'll train under intensivists, manage critically ill patients, and independently perform essential ICU procedures. By the end of the program, you'll be job-ready for ICU and emergency roles.

- 1-Year, Full-Time, Hospital-Based Training
- Perform essential ICU procedures under supervision
- 100% hands-on ICU exposure with intensivists and specialists
- Logbook, mentorship & job assistance
- Certification accepted across hospitals for ICU/emergency roles
- Monthly competency assessments

Sample Certificate

CPD Certificate

Upon successful completion of this program, the participant will be awarded a Advanced Fellowship in Critical Care Medicine Certificate by Doctyn Academy, along with a CPD-accredited certificate.

OFFICIAL CPD CERTIFICATE
& LEARNING REFLECTION TOOL

This certificate verifies that

Accredited cpd Activity

The CPD Standards Office
CPD PROVIDER: 50914
2025 - 2027
www.cpdstandards.com

Has completed the CPD Standards Office accredited activity:
Advanced Fellowship in Critical Care Medicine
Delivered by:
Doctyn Innovations Private Limited
CPD Standards Office Provider Number: 50914

100 CPD HOURS

Curriculum Overview

Course Level: Advanced

Module 1 Introduction to Critical Care Medicine

- Structure and functioning of ICUs
- Roles and responsibilities of ICU doctors
- ICU admission, triage, and discharge criteria
- Patient communication and documentation
- Ethical aspects including consent, end-of-life care, and withdrawal of life support

Module 2 Initial Assessment and Stabilisation of Critically Ill Patients

- The ABCDE approach
- Early warning scores (SOFA, qSOFA, APACHE II, NEWS2)
- Shock recognition and classification
- Sepsis protocols and early goal-directed therapy
- Stabilisation of airway, breathing, and circulation

Module 3 Airway Management

- Airway anatomy and evaluation
- Basic manoeuvres (head tilt, chin lift, jaw thrust)
- Bag-mask ventilation
- Supraglottic airway devices
- Endotracheal intubation
- Rapid sequence intubation
- Confirmation of tube placement
- Difficult airway algorithms

Module 4 Emergency and Resuscitation Skills

- Basic Life Support (BLS)
- Advanced Cardiovascular Life Support (ACLS) algorithms
- Identification of cardiac rhythms
- Defibrillation and cardioversion
- Post–cardiac arrest care

Module 5 ICU Pharmacology

- Vasopressors and inotropes
- Sedation, analgesia, and paralysis
- Antibiotic selection and stewardship
- Insulin infusions and glycemic control
- Transfusion medicine

Module 6 Critical Illness and Syndromes

- Sepsis and septic shock
- Respiratory failure
- Acute kidney injury
- Acute liver failure
- Neurological crises
- Poisoning emergencies
- Obstetric and pediatric ICU essentials

Module 7 Mechanical Ventilation

- Basics of oxygenation and ventilation
- Non-invasive ventilation: CPAP, BiPAP
- Invasive ventilation modes: Volume control, pressure control, SIMV, etc.
- Setting ventilator parameters
- Ventilator alarms and troubleshooting
- Management of ARDS
- Prone positioning
- Weaning protocols and extubation criteria

Module 8 Monitoring in the ICU

- Hemodynamic monitoring (non-invasive and invasive)
- ECG monitoring
- End-tidal CO_2
- Temperature, fluid balance, and nutrition

Module 9 Vascular Access Procedures

Central Venous Catheterisation

- Indications for central line insertion
- Site selection (internal jugular, subclavian, femoral)
- Ultrasound-guided insertion
- Line care and infection prevention

Arterial Line Insertion

- Indications and technique (radial/femoral)
- Waveform interpretation
- Blood sampling and arterial blood gas interpretation

Module 10 Thoracic Procedures

- Chest tube insertion
- Needle thoracostomy
- Management of pneumothorax and hemothorax
- Chest drain care and troubleshooting

Module 11 Gastrointestinal and Feeding Procedures

- Nasogastric and orogastric tube insertion
- Confirmation of tube placement
- Enteral feeding protocols
- Prevention of aspiration pneumonia

Module 12 Genitourinary Procedures

- Foley catheter insertion
- Monitoring urine output
- CAUTI prevention protocols

Module 13 Point-of-Care Ultrasound (POCUS)

- Lung ultrasound: A-lines, B-lines, pneumothorax
- Cardiac ultrasound basics
- IVC assessment for fluid responsiveness
- FAST and EFAST in trauma
- Ultrasound guidance for procedures

Module 14 Tracheostomy Care

- Types of tracheostomy (surgical and percutaneous)
- Tracheostomy complications
- Tube changes and stoma care
- Weaning and decannulation

Module 15 Bronchoscopy Assistance

- Preparation of equipment
- Positioning and assisting during bronchoscopy
- Post-procedure monitoring

Module 16 Bedside Invasive Procedures

- Lumbar puncture
- Paracentesis
- Thoracentesis
- Emergency joint aspiration
- Neurological assessments

Module 17 Cardiac Device Management

- Basics of pacemakers
- ECG interpretation for paced rhythms
- Troubleshooting device issues
- Use of external defibrillators

Module 18 ICU Infection Control and Quality

- Preventing VAP, CLABSI, CAUTI
- Pressure sore prevention
- Biomedical waste management
- ICU quality indicators and audits

Module 19 Case Discussions, Logbook, and Clinical Documentation

- Case sheet writing
- Case presentations
- Morbidity and mortality reviews
- Monthly logbook documentation
- Competency evaluations

Module 20 Final Assessment and Certification

- Theory examination
- Objective structured clinical examination (OSCE)
- Viva voce
- Logbook verification
- Certification process

Practical Exposure

- **Airway management & intubation**
- **Mechanical ventilation**
- **Arterial & central line insertion**
- **Chest tube placement**
- **Tracheostomy care**
- **POCUS (lung, cardiac, IVC)**
- **CPR & emergency codes**
- **ABG interpretation**
- **Sepsis management**
- **Shock resuscitation**

Assessment & Certification

01

Continuous Assessment

- Module quizzes
- Case discussions
- Faculty feedback

02

Logbook

Mandatory record of:

- Core cases
  case discussions
- Procedures
- ICU exposure

03

Final Examination

04

Passing Criteria

- Pass OSCE (≥60%)
- Pass theory (≥60%)
- Clear viva + meet attendance norms

05

Certification

Upon successful completion of this program, the participant will be awarded a Advanced Fellowship in Critical Care Medicine Certificate by Doctyn Academy, along with a CPD-accredited certificate.

Eligibility

MBBS Graduates, Practicing Doctors,
MD/MS/DNB Residents & Graduates

Duration

12-Month Full-Time
Hospital-Based Training

Additional Benefits

Access to Doctyn's
digital learning platform

Case-based discussions
& ICU simulations

Monthly Stipend
Available

Community, mentorship &
career support

Course Fee: 1,80,000*

*plus applicable taxes
*flexible financing options available
