About
Global Med Academy

GlobalMedAcademy is a medical education platform created to help doctors expand their knowledge through accessible, professionally relevant online programs.

Our programs are organised into clearly defined modules supported by current medical guidance, case-based concepts, assessments, and digital learning resources. This allows doctors to continue learning alongside their existing professional responsibilities.

By combining medical knowledge with contemporary approaches to assessment, decision-making, technology, patient safety, and communication, GlobalMedAcademy supports doctors in staying informed in an evolving healthcare environment.

About the **Fellowship**

The 12-month Fellowship in Critical Care Medicine is a fully online, advanced fellowship program designed for doctors who want to develop a systematic understanding of critically ill patient assessment and management.

The program covers airway and ventilation principles, haemodynamic monitoring, shock and sepsis, organ dysfunction, emergency response, critical care pharmacology, infection prevention, patient safety, ethics, and communication.

Program **Highlights**

Systematic Patient Assessment

Study organised approaches to recognising deterioration, prioritising problems, and planning initial management.

Airway and Ventilation

Understand airway assessment, oxygen-delivery strategies, ventilation modes, ARDS, proning, and weaning principles.

Shock and Haemodynamics

Explore shock classification, fluid therapy, vasopressors, inotropes, and monitoring concepts.

Organ Support Principles

Study respiratory, cardiovascular, renal, neurological, and metabolic support concepts.

Emergency Response

Review resuscitation algorithms, arrhythmia recognition, and time-sensitive critical care decisions.

Quality and Patient Safety

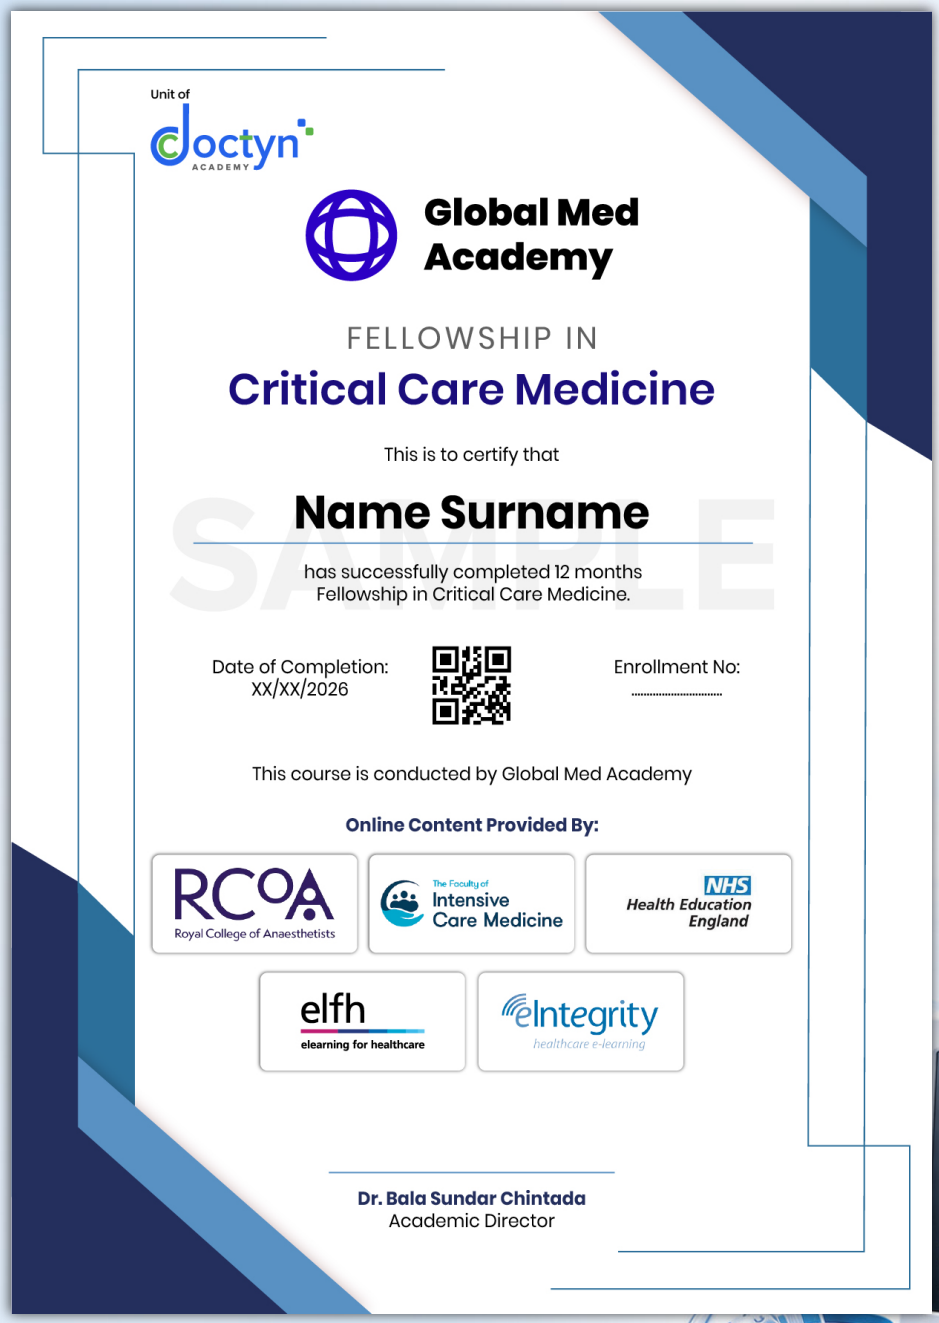

Understand infection-prevention bundles, documentation, communication, ethics, and safety systems.

Global Med Academy

Sample Certificate

Certificate Awarded Upon Successful Completion

The certificate recognises the learner's successful completion of the program curriculum, required assessments, and final evaluation.

Curriculum
Overview

Global Med Academy

Course Level: Advanced

Module 1 Foundations of Critical Care

ICU structure, workflow, ethics
Triage, documentation & communication

Module 2 Assessment & Stabilisation

ABCDE approach
Shock, sepsis, organ dysfunction
Early goal-directed therapy

Module 3 Airway Management

Basic airway techniques
Endotracheal intubation
Difficult airway strategies

Module 4 Mechanical Ventilation

Non-invasive & invasive ventilation
Ventilator modes & settings
ARDS, proning & weaning protocols

Module 5 Vascular Access

Central venous lines
Arterial lines
Ultrasound-guided access

Module 6 Thoracic & Bedside Procedures

Chest tubes, needle decompression
Lumbar puncture, paracentesis, thoracentesis

Curriculum
Overview

Global Med Academy

Course Level: Advanced

Module 7 Emergency & Resuscitation

BLS & ACLS
Arrhythmia recognition
Defibrillation/cardioversion

Module 8 POCUS – Point of Care Ultrasound

Lung, cardiac & IVC scans
FAST/EFAST in trauma

Module 9 Pharmacology in ICU

Vasopressors, inotropes, sedatives
Antibiotic stewardship
Blood products & infusion therapy

Module 10 Specialty Critical Care

Sepsis, respiratory failure, AKI
Toxicology emergencies
Obstetric & pediatric ICU essentials

Module 11 Quality & Infection Control

VAP, CLABSI, CAUTI bundles
Documentation & safety protocols

Module 12 Case Discussions & Logbook

Case sheets, presentations
Supervisor evaluations
Manage ventilators confidently

Assessment & **Certification**

Global Med Academy

01

Assessment and Certification

The program uses online assessments to help learners review their understanding throughout the 12-month curriculum.

02

Module Assessments

- Module-wise quizzes
- Knowledge checks
- Case-based questions
- Applied decision-making exercises

03

Final Evaluation

Learners will complete a comprehensive online assessment covering the major concepts included in the program.

04

Completion Requirements

Participants must:

- Complete all required learning modules
- Submit the required assessments
- Achieve the prescribed minimum overall score
- Successfully complete the final evaluation

05

Certification

Upon successful completion, participants will receive a Fellowship in Critical Care Medicine Certificate from Global Med Academy.

Eligibility

Global Med Academy

MBBS, MD, MS, DNB and FMGE Graduates

Duration & **Delivery**

Duration : 12 Months

Mode : 100% Online

Format : Advanced Online Fellowship Curriculum

Program **Benefits**

Complete Digital Access

Access organised modules, learning resources, and assessments through the online platform.

Flexible Online Learning

Progress through the program alongside your existing professional responsibilities.

Comprehensive Critical Care Curriculum

Explore patient assessment, organ support, emergencies, pharmacology, infection prevention, and safety.

Communication and Ethics

Study documentation, patient-family communication, multidisciplinary coordination, and ethical decision-making.
